

Welcome to *Portable Machining Today!*

Climax Portable Machine Tools is pleased to welcome you to our new on-line newsletter: ***Portable Machining Today***. This newsletter will allow us to quickly communicate with you about:

- Innovative portable machining tips and techniques
- New portable machining training opportunities
- Worldwide industry news, conventions and legislative updates
- New products and accessories
- The latest portable machining applications
- Feedback from portable machinists around the world

We hope you will sign up to receive *Portable Machining Today* on a continuing basis. We expect to send approximately two issues per month and possibly expand our publication to once a week depending on the response from you, our customers. **To sign up for a free subscription to *Portable Machining Today*, simply click on the following link and enter the word "subscribe" as the subject of your e-mail to us: [SUBSCRIBE](#).** If you do not want to receive any additional e-mail communication from Climax Portable Machine Tools, click [REMOVE](#) and enter the word "remove" as the subject of your e-mail.

New Portable Machining Training Classes Now Enrolling The Portable Machining Training Institute is now accepting enrollments for spring semester classes. Courses include hands-on and classroom instruction in machine tool operation along with applications training, maintenance recommendations and specialized tool techniques. Industry-specific courses in service, engineering, power generation, and shipbuilding markets are also available. In addition, courses are available for customized and train-the-trainer programs on location, or at the Portable Machining Training Institute. For a complete listing of classes and schedules click on the following link: [TRAINING](#)

New Plate Chuck Now Available for your Climax FF6000 Flange Facer. The Single Plane Removable Plate Chuck Assembly simplifies your set up by:

- Allowing the FF6000 body and the chuck to be mounted in two pieces separately
- Allowing you to toe clamp the chuck to a heat exchanger or other flat surface
- Allowing the FF6000 to adjust for flatness once it's mounted into the bore
- Allowing you to easily to attach the FF6000 to your own mounting plates using the Climax interface plate
