New 27-Page Cutting Tool Selection Guide Now Available for Free Download

Our new 27-page Cutting Tool Selection Guide is now available. This handy guide will help you choose the right cutting tool for your specific machining operation. The Guide includes handy information about tool geometry, tool bit sharpening, cutting lubricants & fluids plus a variety of quick-reference guides for selecting the proper machine RPM and calculating total machining time. You'll also find a discussion comparing carbide and high speed tooling for use in a portable machining environment. To download your free copy, click [here](#).

Climax to Present a Technical Paper at the 2005 European Nuclear Conference in France

Climax Portable Machine Tools, Inc. & Uddcomb Engineering of Sweden will present a joint technical paper at the Upcoming European Nuclear Conference being held December 11-14 in Versailles France. The paper will review a successful plant life-extending repair to a CRDM system at the Ringhals Nuclear Utility in Sweden. Climax will also be an exhibitor at this show. If you are attending the conference, we look forward to meeting you at our booth. For additional show information, click [here](#).

Updated Technical Data Available for the new Climax BB4500 Boring Machine

In March 2005, Climax Portable Machine Tools, Inc. introduced the new BB4500 Boring Machine. Based upon Climax's popular BB5000 Boring Machine, the BB4500 provides you with a smaller, value-priced boring machine. To find out if this new boring system meets your on-site machining needs, download the new BB4500 Technical Data Sheet by clicking [here](#).

Our Selection of Certified Pre-Owned Tools is Changing Daily

Our new Certified Pre-Owned Tool program has been extremely well received by our worldwide customers and the selection of available tools changes on a daily basis. If the tool you are looking for is not available today, we encourage you to check our on-line listing of available Certified Pre-Owned tools frequently as we are adding new tools every day. For today's selection of Pre-Owned Certified Tools, click [here](#).

By Popular Demand, Climax Introduces the Magnetic Dial Indicator

Students attending classes at the Climax Portable Machining Training Institute have been impressed by a handy magnetic dial indicator used by our faculty to quickly set-up for a variety of machining operations. After receiving many requests to purchase this handy accessory, Climax is pleased to introduce the Magnetic Dial Indicator. One of the most useful tools any field machinist could have, the Climax Magnetic Dial Indicator will speed your set-up and operating time. It is an all-in-one tool for setting depth of cut, dialing in radial and axial machine location, as well as being a useful indicator for measuring machine tool travel. The tool will magnetically attach to any available metal surface including the machine tool itself. The magnet is cast directly into the plastic housing, so no machine chips will get inside. For more information, click [here](#).

Free 2-Day Training Class with Many Climax Portable Machine Tool Purchases

Climax Portable Machine Tools is now offering a free 2-day training class with the purchase of many of our portable machine tool systems. Classes are held at the Climax Portable Machining Training Institute in Newberg, Oregon USA. All classes include a comprehensive training manual complete with handy operational tips and techniques. Contact your Climax Territory Manager or local Climax Distributor for more information. For a schedule of training classes at the Portable Machining training Institute, click [here](#).
